

Ameni AOUITI

Software Engineer - Full Stack & Mobile Developer | React Native · React.js · NestJS

 ameni.aouiti81@gmail.com  +216 58 932 240  Tunis, Tunisie  GitHub - AmeniAouiti  LinkedIn - Ameni AOUITI

PROFIL

Software Engineer with 2+ years of experience building mobile (React Native, Flutter, Kotlin) and full-stack JavaScript (NestJS, Next.js, React.js) applications. Experienced across the full software development lifecycle — from requirement analysis and architecture design to deployment and maintenance. Proven track record as a sole developer on end-to-end products in FinTech, e-commerce, and AI, alongside collaborative work in Agile/Scrum teams. Focused on building scalable, high-performance solutions with strong attention to code quality and DevOps practices.

PROFESSIONAL EXPERIENCE

Full Stack JS Mobile/Web Developer — BrandWood&CO

04.2024 – 06.2026 | Tunis, Tunisia

Part-time Developer (04.2024–11.2025), then Sole Developer for the Sabeel project during End-of-Studies Internship (12.2025–06.2026) 

Served as the sole developer, responsible for the end-to-end design and development of a complete digital ecosystem for Umrah management (web + mobile), seamlessly connecting pilgrims, guides, and agencies.

- Requirement Analysis & Architecture Design: Engineered the technical architecture across backend, web, and mobile platforms.
- Full-Stack Development: Developed robust backend systems (NestJS) and dynamic web/mobile interfaces (React.js, React Native).
- Third-Party Service Integration: Integrated real-time geolocation tracking, Stripe secure payments, an AI spiritual assistant powered by RAG (Gemini API + Qdrant), and emergency SOS alert systems.
- QA & DevOps: Managed continuous testing, deployment, and ongoing maintenance of the entire platform.
- Key Contribution: Successfully designed and launched a strategic new product for the company—a comprehensive digital ecosystem for Umrah management. Independently steered the project from ideation to deployment; currently in a pilot phase with a dozen beta-testing pilgrims and 2-3 partner agencies, while remaining features are actively being developed.

Prior to this mission, developed and maintained 3+ production-ready web and mobile applications utilizing a full JavaScript stack: secure and scalable backend APIs (NestJS), JWT authentication with Role-Based Access Control (RBAC), relational (PostgreSQL, MySQL) and NoSQL (MongoDB) databases, collaborating daily within an Agile/Scrum environment.

- CI/CD Pipeline Implementation: Established automated CI/CD pipelines (GitHub Actions), reducing overall deployment time by approximately **20%**.
- Code Quality Optimization: Enhanced code quality through TypeScript implementation, rigorous code reviews, and best practices, reducing production bugs by roughly **15%**.
- Delivery Capacity Enhancement: Boosted team delivery capabilities by autonomously developing multiple applications in parallel.

Tech Stack: NestJS · React.js · React Native (Expo · Expo Router · EAS Build) · UI/UX design · PostgreSQL · Redis · Socket.IO · WebRTC · Stripe · Mapbox · JWT · Cloudinary · Docker · Vercel · RAG · Gemini API · Qdrant · TypeScript · GitHub Actions

Full Stack Mobile Developer Intern — Pulpe Tech (FinTech)

06.2025 – 09.2025 | Tunis, Tunisia

Teamwork 

Worked within a Flutter/NestJS team, responsible for integrating KYC microservices (Onfido) and advanced authentication (Ory) for Flexy Bank, a white-label mobile banking application customizable for each partner bank.

- Security & Identity Verification: Integrated Onfido KYC and Ory multi-factor authentication, robustly securing the user onboarding flow.
- Payment & Communication Systems: Contributed to secure payment processing pipelines and automated SMS communication via Twilio.

Stack: Flutter (MVVM) · NestJS · PostgreSQL · Twilio API · Docker · Onfido · Ory · Bridge

Full Stack Web Developer Intern — Tunav

06.2024 – 08.2024 | Chargaia 1, Tunis

Teamwork 

Worked within a cross-functional team, responsible for developing a secure dashboard and a multi-role authentication system for a customer and complaints management web application, built using .NET Core and React.js.

Stack: .NET Core · React.js · SQL Server · MVC Architecture · Docker · Postman · Git · Scrum

Network Administrator Intern

2023 – 2023 | Sfax, Tunisie

CHU Habib Bourguiba | OACA Sfax Thyna Airport 

- Requirement Analysis & Monitoring Design: Analyzed infrastructure requirements and designed a comprehensive network monitoring solution.
- Monitoring Infrastructure Deployment: Deployed Prometheus, Grafana, and various metric exporters (SNMP, Node, Blackbox, Windows) to ensure real-time visibility.
- Secure Authentication & Identity Management: Implemented secure network authentication on Windows Server 2016 utilizing Active Directory, NPS, and RADIUS protocols.

Stack: Prometheus · Grafana · Active Directory · RADIUS · VMware

PROJECT

Sendit — Full Stack Mobile Developer

Independent Development

Served as the sole full-stack developer (mobile + backend) for a parcel delivery matchmaking application featuring dynamic role switching (client, traveler, driver) within a single user account.

- Dynamic Architecture: Architected the dynamic role system and engineered the core reservation workflows.
- Advanced Features & Storage: Implemented real-time messaging and voice calling (Socket.IO), automated commission splitting via Stripe payments, and secure file storage (MinIO).

Stack: React Native (Expo) · NestJS · MongoDB · Stripe · Socket.IO · Mapbox · Twilio API · MinIO · Docker · JWT

PrimeProfs — Full Stack Mobile Developer

Teamwork

Worked within a cross-functional team, responsible for real-time messaging, Stripe payment integration, and OAuth2 authentication for an educational mobile application integrated with an AI chatbot (Ollama – Llama 3).

- Real-Time Communication & Security: Developed the real-time messaging system and implemented secure OAuth2 authentication.
- Feature Integration: Integrated Stripe payment pipelines and an AI chatbot powered by Ollama (Llama 3).

Stack: Flutter (MVVM) · NestJS · PostgreSQL · Ollama (Llama 3) · Stripe · Socket.IO · OAuth2 · Scrum

GoTogether — Full Stack Web Developer

Teamwork

- Co-developed a collaborative group travel planning web platform featuring AI-driven recommendations and an interactive marketplace.
- Built the low-latency group messaging infrastructure using WebSockets and designed the core itinerary management module. **Stack:** Next.js 14 · MongoDB · Stripe · TypeScript · Tailwind CSS · WebSockets · Scrum

Kurubis Uniforme de Tunisie — Full Stack Web Developer

Independent Development

Served as the sole full-stack developer for a B2B e-commerce platform specializing in professional workwear and uniforms.

- Requirement Analysis & Architecture: Conducted full requirement analysis and designed the platform's core architecture, including industry-specific catalogs and an advanced cart/quote system.
- Portal & Core Development: Developed the admin back-office, client portal, and real-time messaging infrastructure with Role-Based Access Control (RBAC).
- Cloud Deployment & Maintenance: Executed full cloud deployment (Vercel, Supabase, Cloudinary) and managed ongoing platform maintenance.

Stack: Next.js · React · TypeScript · Supabase · PostgreSQL · REST API · Tailwind CSS · Cloudinary · Nodemailer

 COMPÉTENCES

Mobile Development : Flutter, React Native Kotlin	Web Development: Next.js, React.js, TypeScript, Tailwind CSS, HTML5	Backend : NestJS (Node.js · Express), .net, Spring boot	DevOps & Cloud : Docker, Kubernetes, CI/CD, GitHub, AWS, Vercel
Programming Languages : TypeScript, JavaScript, Java, dart, php, python, C#	AI & LLM : RAG, Llama 2/3, Ollama, Prompt Engineering, AI Chatbots, Semantic Search, Vector Databases, LangChain, Generative AI, API Integration.	Databases: PostgreSQL, MongoDB, MySQL	Tools : Git, Postman, Cursor, Windsurf

 ÉTUDES

National Engineering Diploma in Computer Science <i>ESPRIT – Private Higher School of Engineering and Technology</i>	2026 El Ghazala - Ariana, Tunisia
Bachelor's Degree in Information Technology ISET – Higher Institute of Technological Studies	2023 Sfax, Tunisia

 CERTIFICATES

- Generative AI with Diffusion Models - NVIDIA
- Attendance Hashgraph Developer - The Hashgraph Association
- AWS Academy Graduate - Cloud Foundations - Training Badge Amazon Web Services (AWS)
- Applications of AI for Predictive Maintenance - NVIDIA
